CAGEL NAIL SYSTEM

Treat yourself and your hens to the ultimate manicure. Cagel is a coloured gel treatment for nails. It's a bit like a long-lasting polish, the organic compound gel is painted on to the nail before being set under a UV light. Once on, it is gas-permeable so your nails can breath and won't chip. What's great about it is, it's available in 40 colours, and can also be used with nail extensions.
