

CALCURE

No salon should be without Calgel's amazing Calcure!

Calcure was developed by Calbrook Cosmetics to treat those nasty fungal infections, but what makes Calcure stand above most fungal cures on the market is its ability to kill spores on contact and if you don't believe us, listen to Sally's story:

Sally, a client at 'Friends' in Harpenden, booked herself in for a pedicure. When starting the pedicure, Annalise, the technician, noticed a severely infected toenail and recommended Calcure to treat the infection. Not too convinced, Sally took the product away. Within a week, Sally returned to the salon with a shoebox-full of prescription creams, ointments, pills etc to treat the fungal infection. She proudly stated that she hadn't found anything in the past year that had helped or even improved the infection compared to the difference she had noticed over the last week using Calcure. She was sold!

No well-respected salon likes advertising for fungal infection treatment - we all know infections are not exclusive to clients who have nail enhancements. Why not be proactive and keep a few bottles of Calcure available? These can even be used before an infection has set in on a nail where the seal has been broken due to a bad bump.

You can purchase Calcure directly from Head Office for £3.15 (+ VAT). Recommended retail price £7.50.

Fungal infections - make a difference today! Remember, prevention is better than cure!
